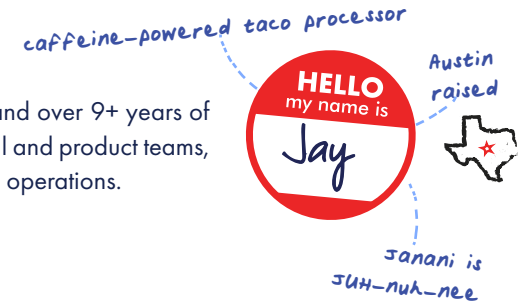
I am a full-stack UX researcher and designer with technical chops, and over 9+ years of experience. I specialize in translating design requirements to technical and product teams, and bring a strong analytical and collaborative framework to design operations.



KEY RELEVANT EXPERIENCE

AMOpportunities - Product Design Manager
December 2018 - August 2020

RESEARCH

- Lead and conduct elicitations with stakeholders. Conduct competitive analysis.
- Generate approaches to establish research practice. Build sourcing program for research participants. Conduct listening sessions, user interviews, heuristic analyses, and usability evaluations with a wide range of prospectives/user audiences.
- Synthesize elicitations and research into service blueprints. Generate high-level journey map and micro-journey maps for user audiences.
- Develop stakeholder buy-in and conduct content audit; generate content inventory. Develop taxonomies for each internal stakeholder team. Identify structured data needs and map them.
- Lead UX research insights and strategy check-ins.

DESIGN OPERATIONS

- Establish and build design system and documentation process, generating a research notebook available for the entire organiziation to track relevant research, insights, and status.
- Generate lo-fi mockups, mid-fidelity wireframes, and interactive prototypes for mobile-first digital product platforms: SaaS B2C platform, admin B2B platform, and company websites
- Lead regular design reviews. Document iterations and feedback.
- Generate visual design and accessibility guidelines, and ensure accessibility heuristics are included in design review processes.
- Participate in daily stand-up with development team to track development of design system components, code components and deployment best practices.

TECHNICAL BRIDGING

- Conduct analysis of current front-end technology limitations and possibilities. Conduct listening sessions and evaluations with development team and leadership on design implementation.
- Compare Javascript and CSS front-end frameworks. Investigate UI engineering capacities for various accessibility, interaction design, and motion design needs.
- Building on content audit and inventory needs, plan and deploy shift to structured data to improve information architecture for complex user tasks.
- Analyze database schema and front-end implementation. Design new content object and design component relationships.
- Create content JSON structures based on new taxonomies, and develop content clean-up project for programs team.
- Based on usability research and service design discoveries, present CMS and CRM options and contribute to implementation of both systems.
- Contribute to code repository for front-end styling, and design system components.

MANAGEMENT

- Build product design practice and advocate for cross-functional product management practices for organization in low maturity, high-growth timeframe.
- Organize team platform training for new CMS and CRM systems. Advocate for testing and launch cycles.
- Hire design team and interns, and manage direct report. Set quarterly reviews, manage assessments and career goal reviews.
- Manage budget for design resources and ongoing education. Get approval for research campaign budgets for participant compensation.

TOOLS AND TECHNOLOGIES

General

- Adobe Creative Suite
- Wireframing and Prototyping: XD, Axure, Figma, Zeplin
- Creative treatments, storyboarding
- Mural, Lucidchart, Miro
- Hotjar, Sessionstack, Optimizely
- Google Analytics, Search Console
- Git/version control systems
- Agile/Scrum

Development

- HTML/CSS
- Data structure and serialization: JSON/XML/YAML
- JS frameworks: React, Angular, Vue
- CMS: Sanity.io, Gatsby, Wordpress
- Test-driven development
- Pair programming
- API development

EDUCATION

University of London

BSc Computer Science (in progress)

(ISC)² Certification

SSCP Certification (in progress)

Actualize 2018 Spring Cohort

Developer Bootcamp Graduate

DeltaCX Certification

Axure Prototyping:
Core and Advanced Certifications

UXC - NN/g UX Certification

#1023962, July 2018

The Embody Lab - Fall 2021

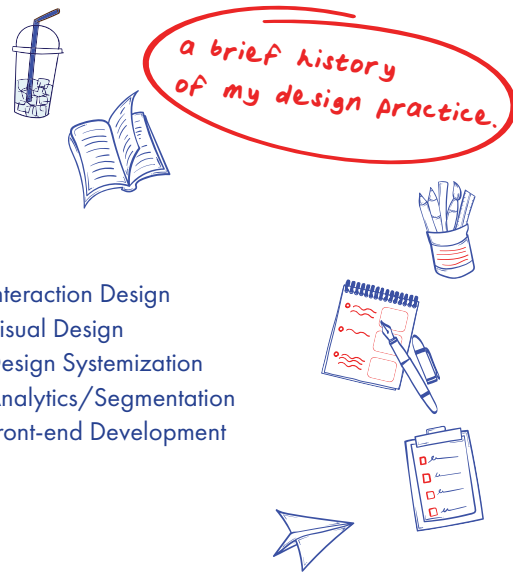
Integrative Somatic Trauma Therapy
60-hour Certification

University of Texas at Austin

BA History/Linguistics
Spanish/Sanskrit minors

JANANI JAY

My research and design practice focuses on people, process, and equity; it is grounded in participatory methods and critical pedagogy. I work to unravel assumptions, coproduce understanding and alignment, and stay responsive to emergent needs and contexts.



KEY SKILLS

UX Research Methods
Participatory Research
Research Strategy
Content Strategy
Information Architecture/Taxonomy

Elicitation
Facilitation/Presentation
Writing
Change Management
Service Mapping and Productization

Interaction Design
Visual Design
Design Systemization
Analytics/Segmentation
Front-end Development

OTHER DESIGN EXPERIENCE

New Tech Innovation LLC - Services Manager and Design Lead
September 2020 - present

- Develop client relationships and research strategy, conduct audit research, produce documentation; conduct evaluative research across client stakeholders in their problem space. Produce audit report.
- Lead change management in client organizations through audit recommendations, policy development, and the establishment/facilitation of oversight bodies - in first six months produced new processes and documentation that secured new clientele and increased revenue streams by 100% from 2020 to 2022.
- Generate intervention methodologies based on evolving threat contexts, design intervention aids and develop training programs to empower clients and facilitate change management.
- Evaluate and improve rapid response service design using accessibility heuristics and delivery frameworks such as SWSM.
- Produce service maps and conduct generative research towards productization.
- Facilitate weekly/monthly resarch reports for clients in a variety of sectors and regions; implement feedback surveys in order to better understand their uptake and impact.
- Lead cross-functional team to launch 2021 content campaign including: digital security newsletters for client segments (over 60% open rate) in tandem with well-attended monthly security webinars; develop multilingual digital security information portal; and compile case studies.

PSC Group, LLC - Senior Consultant, Lead UX Designer
June 2017 - October 2018

- Consulted with clients in a wide range of industries. Deliverables: enterprise, B2B, and B2C web/mobile apps with high Apple/Play Store ratings and client satisfaction. Conducted user research, generated design assets and content strategy for clients. Generated visual and interaction design for projects. Developed internal UX capacity, contributing to sales enablement for client acquisition, retention, and satisfaction.

eContext.ai - Digital Taxonomist
November 2015 - June 2016

- Researched client subject matter for data analysis/social media product suite. Produced and refined taxonomies; analyzed structured/unstructured data and terms; tested and cleaned results. Provided user feedback for internal tools and client suite.

MonkeyBars - Lead Product Designer Consultant
May 2014 - May 2017

- Consulted with Fortune 500 clients and organizations on technical platforms, apps, outreach and media for hackathons, technical/testing events, and innovation workshops.
- Showcased new and emerging tech in IoT, 3D printing, and AR/VR.
- Major clients included: Cisco for their Internet of Things World Forum where we designed and threw the IoTWF Hackathon; AbbVie, The People's Music School, GoGo Mobile, and The Mozilla Foundation.

HUMAN THINGS I DO WELL

- Listening
- Asking questions
- Not being a know-it-all
- Not assuming anything
- Insatiable curiosity
- Pixel eye and color brain
- Crisis management
- Translating between design and technology

FIELD EXPERTISE

- Healthcare: Medical Education and Training
- Digital Security and OSINT
- Information Security: Systems, Compliance, and Regulatory Review
- Technical Consulting
- Design Consulting
- Product Research for Paper and Pulp
- Accessibilty Research for Stationery
