I am a security researcher, rapid responder, and digital security trainer with a background in UX and service design. My work is grounded in a trauma-informed lens and years of customer service experience, and focused on building security capacity and resilience.

EXPERIENCE

New Tech Innovations - Services Manager and Design Lead
contractor January 2020 - August 2020, FTE September 2020 - present

SERVICE DESIGN

- Generate high-level journey map and sub-journey maps covering end-user clients, as well as internal/external stakeholders.
- Lead and conduct elicitation and research to produce a variety of reports, including design research reports, security reports, quarterly service summaries, and business development service summaries.
- Lead new CRM implementation from start to finish: conduct platform comparison research, lead stakeholder research and elicitation, organize team platform training, and implement testing and launch cycles.

CONTENT DESIGN

- Work with operations and business development to define service operations and contracting. Piloted and developed services overviews, templates, and other artifacts, which has led to a 100% increase in revenue in 2022 from 2020.
- Lead cross-functional team to launch 2021 content campaign including: digital security newsletters for client segments (over 60% open rate) in tandem with well-attended monthly security webinars; develop multilingual digital security information portal; and compile case studies.
- Facilitate weekly/monthly resarch reports for clients in a variety of sectors and regions; implement feedback surveys in order to better understand their uptake and impact.
- Review, update, and improve our audit questionnaires and templates.

SECURITY RESEARCH AND TRAINING

- Work with highly-constrained user and client populations in time-sensitive, high-risk emergent contexts. Clients include activists, organizers, funders, academics, journalists, campaigns, elected officials, and celebrities, from the individual level to groups and institutions.
- Write security audit reports, do hands-on implementation planning and 1-1 or group guidance, deploy security working groups (SWGs) within client organizations, and engage in digital security maintenance cycles.
- Work with clients, legal, and regulatory advisors to ensure implementation and training plans are within legal operating contexts. Work with SWGs to develop security policies and best practices for client organization.
- Contribute to original technical and ethnographic research within digital security.
- Consult with third-party and downstream digital security providers on digital servicing workflows within their product platforms.
- Develop training content and generate intervention methodologies.
- Make security topics relevant and interesting: design intervention aids, training material, and write presentation supplements using best practices from information and visual design, critical pedagogy, and storytelling.
- Organize and co-lead workshops and multi-day training intensives on remote platforms to client organizations and groups across a variety of sectors, tailoring content to their needs.

PRODUCT DESIGN

- Lead user research to evaluate service program and competitive landscape, and generate insights for productization plan.
- Generate lo-fi mockups, mid-fidelity wireframes, and interactive prototypes for responsive digital product platform, as well as contribute to design needs in digital platforms in adjacent pillars.

FIELD EXPERTISE

- Healthcare: Medical Education and Training
- Digital Security
- Information Security and Systems
- Open Source Intelligence (OSINT)

EDUCATION

University of Texas at Austin

BA History/Linguistics
Spanish/Sanskrit minors

Actualize 2018 Spring Cohort

Developer Bootcamp Graduate

UXC - NN/g UX Certification

#1023962, July 2018

DeltaCX Certification

Axure Prototyping - Core and Advanced

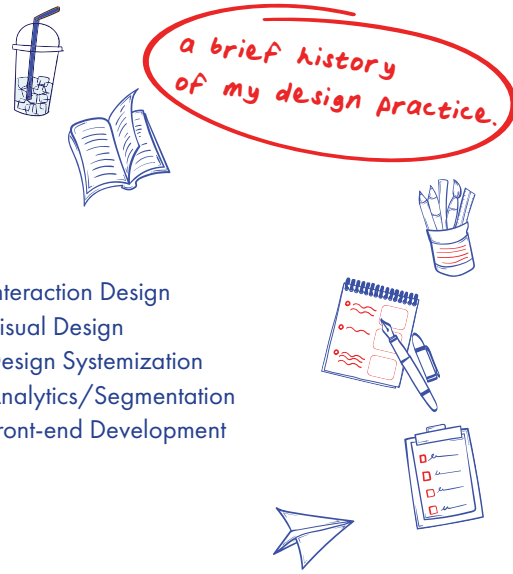
SSCP Certification (in progress)

JANANI JAY

My research and design practice focuses on people, process, and equity; it is grounded in participatory methods and critical pedagogy. I work to unravel assumptions, coproduce understanding and alignment, and stay responsive to emergent needs and contexts.



KEY SKILLS

UX Research Methods
Participatory Research
Research Strategy
Content Strategy
Information Architecture/Taxonomy
Elicitation
Facilitation/Presentation
Writing
Change Management
Service Mapping and Productization
Interaction Design
Visual Design
Design Systemization
Analytics/Segmentation
Front-end Development

EXPERIENCE

AMOpportunities - Product Design Manager
December 2018 - August 2020

- Built product design practice and cross-functional product management practices for organization in high-growth timeframe.
- Initiated and built design system and documentation, from UX design assets and guidelines, to code components and deployment best practices.
- Conducted competitive analysis, elicitations, and assisted in product road-mapping, integrations planning, and in producing product and performance analytics.
- Led UX research and strategy sessions, generated a variety of product and service design deliverables.
- Generated wireframes and pixel-perfect interactive prototypes and led team reviews.
- Led design and testing of new SaaS B2C platform, admin B2B app, and company website.

PSC Group, LLC - Senior Consultant, Lead UX Designer
June 2017 - October 2018

- Consulted with clients in a wide range of industries. Deliverables: enterprise, B2B, and B2C web/mobile apps with high Apple/Play Store ratings and client satisfaction. Conducted user research, generated design assets and content strategy for clients. Generated visual and interaction design for projects. Contributed to front-end development. Developed internal UX capacity, contributing to sales enablement for client acquisition, retention, and satisfaction.

eContext.ai - Digital Taxonomist
November 2015 - June 2016

- Researched client subject matter for data analysis/social media product suite.
- Produced and refined taxonomies; analyzed structured/unstructured data and terms; tested and cleaned results.
- Provided user feedback for internal tools and client suite.

MonkeyBars - Lead Product Designer Consultant
May 2014 - May 2017

- Consulted with Fortune 500 clients and organizations on technical platforms, apps, outreach and media for hackathons, technical/testing events, and innovation workshops.
- Showcased new and emerging tech in IoT, 3D printing, and AR/VR.
- Major clients included: Cisco for their Internet of Things World Forum where we designed and threw the IoTWF Hackathon; AbbVie, The People's Music School, GoGo Mobile, and The Mozilla Foundation.

TOOLS AND TECHNOLOGIES

General

- Adobe Creative Suite
- Wireframing and Prototyping: XD, Axure, Figma, Zeplin
- Creative treatments and storyboarding
- Mural, Lucidchart, Miro
- Hotjar, Sessionstack, Optimizely
- GatherContent, Contentful
- Google Analytics and Search Console
- LaTeX

Development

- Test-driven development
- Pair programming
- API development
- Git
- Jira
- HTML/CSS
- JSON/XML/YAML
- JS frameworks: React, Angular, and Vue
- Sanity.io, Gatsby
- PHP/Wordpress
